EDUCATION

Columbia University **Sep 2026 - Expected May 2028**
Master of Science in Biostatistics *New York, NY*
Shanghai University of Finance and Economics **Sep 2022 - Jun 2026**
Bachelor of Economics in International Finance | Outstanding Graduate *Shanghai, China*
University of Notre Dame **Aug 2024 - Dec 2024**
Exchange Student | Coursework: Time Series Analysis, Econometrics *Notre Dame, IN*

PROFESSIONAL EXPERIENCE

TikTok | *Data Quality & Analytics Intern* **Nov 2025 - Mar 2026**
- Conducted stratified error analysis on 400+ low-scoring samples in sports-content AI training datasets to identify labeling and workflow issues and recommend data-quality improvements.
- Defined annotation-quality metrics and audit protocols with the strategy team; standardized weekly accuracy and project-progress reporting.

Pfizer | *Market Access Intern* **Dec 2024 - Mar 2025**
- Automated recurring Excel reporting for 40+ Huiminbao supplemental health insurance projects using Python, reducing update time from 3 hours to 30 minutes.
- Maintained reimbursement and market-access information; prepared specialty-drug application materials and coordinated submissions with project management, compliance teams, and vendors.

IQVIA | *Business Analyst Intern* **Jun 2024 - Aug 2024**
- Reconciled upstream records and filtered anomalous data in R; produced weekly reports and trend visualizations for pharmaceutical clients.
- Tested Novartis iEvent and Bayer Opera platforms, documented case-level issues, and coordinated fixes with developers before deployment.
- Created user guides and Excel operating manuals from client requirements, documenting platform procedures and reporting workflows.

Taiping Pension Insurance | *Asset Management Research Intern* **Jan 2024 - Mar 2024**
- Analyzed insurance asset-management fund-allocation trends using Excel lookups, pivot tables, and charts; verified annual financial-report information against supporting records.
- Summarized asset-management regulations in categorized reference tables to support policy and document reviews.

RESEARCH AND PROJECTS

Semiconductor Index Correlation Research **May 2026 - Jun 2026**
Project | SOX and STAR 50 Cross-Market Analysis
- Analyzed SOX and 15 STAR 50 constituents using lagged-return alignment, correlations, and single-factor regressions across 10 semiconductor stocks and 5 controls.
- Compared raw and STAR 50 ETF-relative returns over 1-, 2-, 3-, and 5-day horizons using a January 2025-May 2026 sample.
- Evaluated stock-level betas, p-values, and R-squared; documented heterogeneous sensitivity, weak explanatory power, and limits of SOX as a standalone predictive signal.

Shanghai University of Finance and Economics **Mar 2025 - Jul 2025**
Research Assistant
- Reimplemented a statistical learning method from R in Python: recursive tree partitioning with ridge regression at terminal nodes, organized into reusable fitting and evaluation modules.
- Compared leaf-size and balance parameters on simulated nonlinear training/test data using RMSE to evaluate predictive performance.
- Parallelized fitting of 200 trees with Python multiprocessing and aggregated tree-level predictions into forest estimates.

Kaggle Competition **Mar 2025 - Apr 2025**
Rainfall Prediction | Top 5%
- Compared logistic regression, XGBoost, and TabPFN for rainfall classification; used K-fold cross-validation and out-of-fold prediction blending, achieving a top-5% ranking by ROC-AUC.

SKILLS AND INTERESTS

Programming & Tools: Python (pandas, NumPy, scikit-learn), R, SQL, Excel (VLOOKUP, pivot tables)
Statistics & ML: Regression, time series, correlation analysis, return-window analysis, model evaluation
Languages: Mandarin (native), English
Interests: Long-distance running (2024 Domer Run 10K), badminton
